PROFESSIONAL SUMMARY

PGDM candidate with internship experience in Business Analytics, HR Analytics, Compensation Benchmarking, KPI Dashboard Development, and Strategic Reporting. Experienced in transforming workforce and business data into actionable insights through dashboarding, scenario modelling, market research, and performance analysis. Skilled in stakeholder reporting, business process evaluation, workforce planning, and data-driven decision-making. Seeking opportunities in Business Analysis, HR Analytics, Management Trainee, and Strategy-related roles.

INTERNSHIP EXPERIENCE

Analytics and Advisory Intern

- Conducted compensation benchmarking across engineering and management roles using India market salary data to support annual increment planning.
- Built multiple compensation increment scenarios and performed cost-impact analysis to support leadership decision-making.
- Executed competitor benchmarking studies to evaluate compensation positioning and workforce competitiveness.
- Supported competency framework development by mapping organizational roles, proficiency levels and performance expectations.
- Performed workforce analytics and strategic reporting to identify improvement opportunities and support business planning.
- Performed role mapping by cross-checking positions against the organizational structure and aligning roles with relevant competencies, responsibilities, and proficiency requirements across departments.
- Prepared structured management reports, analytical summaries and business documentation for leadership review.

EDUCATION

Post Graduate Diploma in Management (PGDM) CGPA: 7.42/9	Rajalakshmi School of Business	2025–2027
---	--------------------------------	-----------

B.E. Electrical & Electronics Engineering CGPA: 7.79/10	K. Ramakrishnan College of Engineering	2021–2025
---	--	-----------

KEY PROJECTS

Automatic Wall Painting Robot

- Developed a remote-controlled robotic system designed to perform automated wall painting with uniform coverage and minimal human intervention.

Automatic Opening Garage Door System

- Designed an IoT-based garage door system that enables hands-free and sensor-based automatic operation.

ECOGUARD – Smart Detector for Harmful Chemicals in Beverages and Vegetables

- Developed an IoT-based detection system capable of identifying harmful chemicals in food items and providing real-time alerts.

CORE SKILLS

Business Analysis: KPI Monitoring, Workflow Analysis, Documentation

HR Analytics: Role Mapping, Competency Framework, Dictionary Development

Management & Strategy: Strategic Reporting, Market Research, Competitor Analysis, Decision Support

Technical: Basic SQL, Excel, Power BI, Basic Python

CERTIFICATIONS

- Data Analytics Essentials
- Google Cloud Career Readiness – Associate Cloud Engineer Track
- Salesforce Administrator Virtual Internship
- Design Thinking
- Introduction to Business Analysis Using Spreadsheets: Basics
- NPTEL – Intellectual Property for Engineers and Technologists

ADDITIONAL INFORMATION

- Active contributor to competency framework development and organizational role mapping initiatives.
- Experience creating analytical reports, dashboards, and workforce planning models.
- Strong interest in Business Analysis, HR Analytics, Strategy, and Management Consulting domains.
